Industrial-grade edge computing racks are instrumental in smart manufacturing environments where predictive maintenance, real-time monitoring, and analytics are required.

Designed to meet IP54 standards, the IT rack and cooling enclosures protect equipment from dust and splashing/dripping water as well as physical and environmental conditions found in factories, ...

Instead of merely adapting existing systems, we committed to hybrid air- and liquid-cooled rack integration that would meet today's needs while future-proofing our ability to support the next wave of ...

Provide Scalability, Modularity, Flexibility and Availability. Innovative idea with several solution options. Proactive not Reactive approach in order to get ahead of the need. Intent to be in touch with ...

Prefabricated Modular EcoStruxure Pod Data Center: Prefabricated, scalable pod architecture enables operators to deploy high-density racks, supporting pods up to 1MW and beyond, ...

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.

EdgeReady micro data centers are expertly configured solutions that are fully customizable for diverse edge deployment strategies and feature 3-5 day order to shipment.

The Murata Power Solutions division is responsible for designing and manufacturing power supplies, while the Murata Subsystems team designs and manufactures OCP, hyperscale, and rack power.

ArcTiv Micro Data Center Racks Provide All-In-One Rack, Power, Cooling and Monitoring Solutions for your Edge-Computing IT Networks.

10MWh Edge Computing Rack

Manufacturing

Maintain proper temperature control inside the rack with outdoor heat rejection. And with the option to mount the condenser on the roof of the rack, added flexibility is built in.
