The 25MW Solar PV project has several benefits for the city. It will diversify the electricity supply and reduce the dependence on NamPower, the national electricity supplier.

Access continuously updated & detailed information on the Windhoek Solar PV project, including its history, financiers & operational status

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 13 locations across Namibia. This analysis provides insights into each city/location's potential for ...

As one of the 5 African countries perfect for solar PV, Namibia was an ideal location for CCBA to install the solar PV system. SOLA carried out the design, procurement and construction of the industrial ...

The project stems from a 2021 bid by the City of Windhoek seeking an Independent Power Producer (IPP) to finance, procure, install, commission, and operate the 25MW solar PV plant ...

The electricity consumption of the city of Windhoek is above 100 MW and thus a further objective of the CoW is to reduce procurement of electricity for servicing the citizens of the city by installing a grid ...

In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is ...

We live and breathe renewable energy. The energy industry worldwide is focused on the most cost-effective technologies for generating electricity: photovoltaics and wind power. And this is exactly our ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

40kWh windhoek pv distribution used at drilling site

JA Solar, a global leader in high-performance photovoltaic (PV) products, supplied critical components for the 1.6MW rooftop distributed solar power plant at Maerua Mall in Windhoek, Namibia.
