In this blog of TAV Technologies, we will examine the importance of renewable energy and sustainable practices in green terminal design.

On July 15, 2025, Jean-Pierre Bemba, Deputy Prime Minister and Minister of Transport, officially unveiled the model for a new terminal at Kinshasa's N'djili International Airport.

Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

From India to Australia, California to Germany, airports are installing vast solar arrays across terminal rooftops, parking structures, and unused land. These installations range from ...

One innovative approach that is gaining traction is the use of solar power to fuel airport terminals. These solar-powered terminals are not only environmentally friendly but also cost-effective in the long run, ...

PORT AUTHORITY AND THE NEW TERMINAL ONE CONSORTIUM KICK OFF CONSTRUCTION OF NEW YORK CITY'S LARGEST SOLAR ARRAY AT JOHN F. KENNEDY INTERNATIONAL AIRPORT

The design and construction of green terminals play a crucial role in this transformation, integrating renewable energy sources and sustainable practices to create efficient and ...

Leading the way are solar-powered terminals. A set benchmark, the Cochin Airport in 2015, was the first airport worldwide to become fully solar-powered.

The transformation of airports through solar power goes beyond an environmental initiative--it demonstrates the potential of large-scale solar installations. By incorporating solar energy, airports ...

600kW Solar-Powered Container Terminals for Airports

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...
