Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. This isn't a temporary blip. It ...

US solar module prices rose in December 2024 for the first time since last summer, driven by tariff adjustments and patent litigation uncertainty, according to Anza.

Summary: Rising photovoltaic module prices are reshaping the solar industry. This article explores the causes behind cost fluctuations, actionable strategies for businesses, and emerging opportunities in ...

Yes, solar panels are still worth it for the vast majority of U.S. homeowners in 2026 and beyond, despite the end of the 30% federal solar tax credit for some systems. The primary financial driver is the cost ...

Prices for photovoltaic solar panels for homes are low now, but this may change in the future. Favorable government incentives for solar energy are decreasing or being phased out entirely ...

In recent months, solar panel prices have experienced a notable increase after reaching a low point. This shift is influenced by various factors, including international market dynamics and ...

A leading module manufacturer told OPIS that while cost pressures are genuine, the sustainability of price hikes remains uncertain, pending further policy clarity and downstream market ...

Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased ...

Once that inventory is gone, price increases will be fully passed on to consumers--and industry insiders are expecting that to happen quickly. "We anticipate solar pricing to shift ...
