-----

Ensure optimal battery consistency by transferring energy from high-energy single batteries to low-energy ones, or boosting the lowest energy single battery using the entire energy bank.

Individual pricing for large scale projects and wholesale demands is available. This product is suitable for 8~20S large capacity of lithium cobalt acid, lithium manganese, ternary lithium, lithium iron phosphate ...

About this item BMS features: 5A high-efficiency equalization, energy transfer equalization with less heat and more safety, automatic on/off equalization, 24-hour real-time equalization, high-quality capacitors ...

This is a 14S LiFePo4/lithium ion 5A equalizer used for 48V battery pack. This device acts as a balancer/equalizer to balance the capacity of cells inside 48V battery pack.

With under-voltage sleep protection, only detecting the battery voltage of B1, the equalizer will automatically stop entering the sleep state when the B1 voltage is lower than 2.7V, and the ...

When the voltage is lower than 40V, the equalizer needs to provide external DC 40V~100V power supply. For a battery pack with 24 strings of batteries connected in series, the wiring method is ...

Balancing power ranges from 5% to 30%. When the device is in normal status, click "Automatic Balance" to automatically detect the maximum and minimum voltages. Discharge the higher voltages to match ...

Buy 2.7V/16V Lithium Titanate Battery Equalization Circuit BMS Balance 1S~6S Farad Capacitor Module with fast shipping and top-rated customer service. Newegg shopping upgraded (TM).

These battery equalizers prevent this from happening. This yields up to 30% more power and will extend the life of the battery pack. Keeps your batteries voltage difference within 10mV! and 8S+8S+8S+4S ...

Balancing power ranges from 5% to 30%. When the device is in ...
