-----

The evolving energy requirements of AI data centres and their impact on the grid. How flow battery technology supports reliability, flexibility and sustainability.

This article will explore the basic structure, working principle, classification, advantages, production processes, industry chain, and future development prospects of flow battery in order to gain a deeper ...

The 16th edition of the International Flow Battery Forum will take place from 16 to 18 June 2026 in Budapest, Hungary, supported by Flow Batteries Europe! A pre-conference workshop will ...

Unlike traditional chemical batteries, Flow Batteries use electrochemical cells to convert chemical energy into electricity. This feature of flow battery makes them ideal for large-scale energy ...

A forward-looking presentation from Fraunhofer UMSICHT, in collaboration with the German Space Agency, on flow battery applications in space environments. ...And more, check the ...

Our conferences cover a broad range of interests in the research and ...

Our conferences cover a broad range of interests in the research and commercial aspects of flow batteries. In 2026, the International Flow Battery Forum (IFBF#174;) will host its 16th edition in the city of ...

Technological Advancements: Research is pushing the boundaries of flow battery technology, leading to improved efficiency, longer lifespans, and reduced costs. This includes ...

The International Flow Battery Forum (IFBF#174;) - the leading event for the flow battery community - is back on 16-18 June in the capital of Hungary, Budapest, at the Intercontinental Hotel, located in the ...

The International Flow Battery Forum 2026 is the 16th edition of a long-running meeting dedicated to flow battery technology. Held from 16 to 18 June 2026 in Budapest, Hungary, the forum will convene ...
