-----

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. By the end of 2024 about 3.9 GW of solar had been installed. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity gener...

Bulgaria has officially approved the development of a 500-MW solar power project, marking a significant milestone in the country's renewable energy transition. Once completed, the ...

A high share of solar and wind power indicates significant progress in decarbonization, but excessive curtailment--where renewable electricity is wasted due to grid constraints or insufficient ...

Solar power in Bulgaria was expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/ ...

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year thanks to a large pipeline of utility-scale projects.

Recent legislative changes in Bulgaria aim to facilitate the permitting process for solar power plants. The report provides a complete picture of the market situation, dynamics, current issues and future ...

Bulgaria reached a critical milestone in its renewable energy transition in 2025, building 1,416 MW (1.4 GW) of new solar photovoltaic (PV) capacity -- its third consecutive year above 1 GW - bringing the ...

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year, according to a report from pv magazine. Official data shows the country ...

Bulgaria's government outlines plans for renewable energy, yet lacks concrete strategies for rooftop solar installations despite the country's high solar potential. While a draft strategy exists, it lacks ...

# Bulgaria Solar Power System

Our positioning as a leading country in photovoltaic energy production not only supports the realization and fulfillment of the decarbonization commitments of Bulgaria but also has a positive ...

The power plant is on track to become operational early next year. A 123 MW system will be on 400 hectares between the villages of Knizhovnik and Dolno Vojvodino in Haskovo.
