Where will solar power be built in Bulgaria?

The first solar plant, near Stara Zagora, is already operational, and two more solar plants will be built near Kyustendil and Vidin. The wind farm, situated in northeast Bulgaria, will set new benchmarks for innovation and efficiency in the region.

Is Bulgaria paving the way for a resurgence in wind energy investment?

Bulgaria is paving the way for a resurgence in wind energy investment after years of stagnation, as detailed in a new study produced by business intelligence provider SeeNext, in collaboration with Gugushev & Partners Law Office.

Why did United group invest in Bulgaria?

"United Group's investment is a transformative moment for Bulgaria. It strengthens energy resilience, drives economic growth, and firmly positions Bulgaria as a leader in renewable energy. We're excited to see the impact this project will have on our country and our region."

How much electricity will Bulgaria produce by 2027?

By 2027, these projects will supply 160% of the electricity needed for the Group's Bulgarian operations, meet 65% of its total electricity consumption, and eliminate approximately 120,000 tonnes of CO2 emissions from the Bulgarian electricity grid each year.

By Abdullahi Lukman United Group, a leading telecommunications powerhouse in Southeast Europe, has invested EUR120 million in renewable energy in Bulgaria. This initiative is ...
