There are ideas for using second-hand Li-ion electric vehicle (EV) batteries for RES energy storage. This would likely reduce the cost of the RES ES facility based on LI-ion chemistry further, and the LA ...

Some 151 project bids for support were submitted for the scheme, which will provide up to 1.154 billion BGN (EUR590 million/US\$540 million) for up to 50% of the construction costs of 3.1GWh of ...

The newly updated Bulgaria BESS Market Outlook 2025-2034 highlights both the opportunities and challenges that will shape this sector over the next ten years.

Bgaria will finance 82 standalone battery storage projects worth over 1.15 billion levs (\$675 million) under its EU-funded procurement exercise named RESTORE.

The 31 projects will create more than 4 GWh in usable energy storage capacity, the Ministry said.

This solar plus storage project, located in Razlog, Southwestern Bulgaria, was realized by the EPC company Solarpro in partnership with the stationary battery manufacturer Hithium.

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The final decision, ...

Among the most promising and actively implemented energy storage technologies are lithium-ion batteries, which can provide high energy density and longevity. Hybrid systems combining ...

Hithium has launched a 55 megawatt hours (MWh) battery energy storage system (BESS) project in Razlog, southwestern Bulgaria. The project, the largest in Eastern Europe, has been ...
