-----

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A ...

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power subsidiaries that, if constructed, would each become the largest in the United ...

Make valuable connections and source new business partners at Intersolar & Energy Storage North America.

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to power 850,000 homes for four ...

The Energy Commission's Solar Equipment Lists include PV modules, inverters (including smart inverters), meters, battery and energy storage systems, and related equipment.

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification program. The CES said that this battery storage project is ...

California regulators approved Intersect Power's Darden Clean Energy Project, which is expected to be the largest battery energy storage system in the world when completed.

The California Energy Commission (CEC) has approved the Darden Clean Energy Project, which the agency said is the first to be fast-tracked under the group's Opt-In Certification program.

As the golden state's grid evolves into a 21st-century clean energy powerhouse, the CEC Energy Storage System compliance has become the ultimate market access pass. Let's unpack why this certification ...

This expansion allows the CEC to oversee the permitting of clean and renewable energy facilities, including solar photovoltaic, onshore wind, and energy storage systems, and facilities that produce or assemble clean ...
