During the meeting, Cao Renxian proposed a cooperation plan to build a 10GW annual-capacity energy storage battery factory in Egypt. The talks also explored the possibility of tripartite ...

In addition, Cao Renxian also pointed out that at this stage, it is reasonable to require photovoltaic power stations to be equipped with a certain proportion of energy storage system, but ...

Cao Renxian believes that the deep integration of photovoltaics and energy storage, and photovoltaic hydrogen production will have great potential in the future.

As the photovoltaic (PV) industry continues to evolve, advancements in Cao Renxian talks about photovoltaic energy storage have become critical to optimizing the utilization of renewable energy ...

Cao had pushed Sungrow into energy storage in 2015, years before batteries became a global obsession. Large, containerized battery systems prop up renewable-heavy grids and buffer...

Cao Renxian and his Sungrow Power Supply have not stopped moving forward, relying on the advantages of the photovoltaic industry to extend the layout of new energy industries such as ...

This focus on innovation has led to the development of a wide range of products, from advanced inverters that optimize solar power generation to energy storage solutions that enhance ...

With our comprehensive approach, we strive to provide timely and valuable insights into best practices, fostering innovation and collaboration within the energy community. Join us today to shape the future ...

On December 18, Cao Renxian, Chairman of China Photovoltaic Industry Association, delivered a leadership speech at the 2025 Annual Conference of Photovoltaic Industry.

Cao Renxian talks about photovoltaic energy storage

Cao Renxian is the chairman and CEO of Sungrow, which makes renewable energy products such as solar PV inverters, wind power converters and energy storage products.
