-----  
How do I charge my leisure battery?

Charging begins automatically. The controller regulates voltage and current to safely charge your leisure battery. You can monitor voltage or battery level on the controller's screen or LEDs. To disconnect, remove the caravan solar panel connection first, then disconnect the controller from the battery.

How do you charge a leisure battery on a caravan?

With most caravans using modern 13-pin towbar electrics (standard since 2008), your leisure battery is charged from the tow-vehicle's alternator while the caravan is being towed. The alternator charges the tow-vehicle starter battery and the leisure vehicle battery. The charge is delivered through pin No 9 in the electric connector socket.

Can a motorhome charge a leisure battery?

One advantage of a motorhome is that you can charge the leisure battery by starting the engine and going for a drive, though this will only top-up the battery as the vehicle wiring only has a limited capacity. It is not quite so easy for caravanners, but you can have a second battery and charge it in the boot of your car as you drive around.

How long does it take to charge a caravan battery?

So, our experts at Snappy Start decided to put something together and guide you through simple ways to get your caravan, motorhome, or camping battery fully charged. Charging time for a 12V leisure battery can range from 4 to over 10 hours, depending on the charger and battery capacity. Using a smart automatic charger can speed this up safely.
