What is Chile's new lithium strategy?

On April 20, the Chilean government announced its new lithium strategy, which plans to give control of the country's lithium industry to the state.

Will Chile be a partner in lithium extraction?

(April 21) (AP video/Victor R. Caivano) SANTIAGO, Chile (AP) -- President Gabriel Boric has announced a plan to require that private companies take Chile's government on as a partner in the extraction of lithium, which is in high demand around the world for use in electric batteries.

Can Chile become a regional leader in electric vehicle battery production?

A new report by the International Council on Clean Transportation (ICCT) and Centro Movilidad Sostenible (CMS) outlines how Chile can move beyond lithium exports to become a regional leader in electric vehicle battery production.

What is the legal status of lithium in Chile?

The legal status of lithium is an exception in Chile's mining concession system. Through Law Decree No. 2,886 of 1979, Chilean legislation reserved lithium for the State, rendering lithium reserves non-concessionable. This regulation is also enshrined in Law No. 18,097 of 1982 and the Mining Code of 1983.

Lithium batteries have been proven to meet these requirements. 2 This has made lithium a key element, putting pressure on countries with abundant reserves of the element. In fact, the ...

Chile is a key player in the global transition to electric vehicles, holding 31% of the world's lithium reserves and supplying more than 20% of global lithium production. Development of a ...

A new report by the International Council on Clean Transportation (ICCT) and Centro Movilidad Sostenible (CMS) outlines how Chile can move beyond lithium exports to become a ...

SANTIAGO, Chile (AP) -- President Gabriel Boric has announced a plan to require that private companies take Chile's government on as a partner in the extraction of lithium, which is in ...

Chile orders lithium battery packs

Chile has wrapped up the initial phase of its efforts to award special lithium operation contracts (Ceols) to private companies, drawing applications from seven firms and consortiums.

This report "Expanding the lithium value chain in Chile: Mining, batteries, and recycling" by the International Council on Clean Transportation explores the economic potential of lithium ...

A new ICCT-CMS report outlines a roadmap for Chile to evolve from lithium exporter to regional battery production hub, generating billions in revenue and thousands of clean-tech jobs by ...

In Chile, lithium is extracted from brine and exported primarily as lithium carbonate (Li_2CO_3) or lithium hydroxide (LiOH). Subsequently, together with other minerals (copper, cobalt, ...

On April 20, the Chilean government announced its new lithium strategy, [1] which plans to give control of the country's lithium industry to the state. While Chile's decision is fueling much ...

Chile lithium valley unlocks \$2B battery supply chain opportunity. Submit your inquiry to join the lithium value chain in South America.
