In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

Reports from experts indicate that hidden communication devices were found embedded within solar batteries and inverters--the essential equipment that connects solar panels to electricity ...

US energy officials are reassessing the security risks posed by Chinese-made power inverters and batteries--key components in renewable energy infrastructure--following the discovery ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...

According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

U.S. energy officials are reviewing security risks posed by Chinese-made components in renewable energy systems after discovering hidden communication devices in some units, according ...

China Solar Wireless On-site Energy Equipment

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.
