-----

Eastern Wind Power, Inc. has developed the Sky Farm(TM) 50 kW Vertical Axis Wind Turbine (VAWT) with the strength, stability and versatility to withstand accelerated winds when roof-mounted on high ...

But rooftop wind turbines are a rarity in commercial buildings, and there are a few practical reasons for this. One of the reasons is because the wind turbulence around most rooftops ...

A new, bladeless wind energy system captures airflow over commercial rooftops, providing a silent, high-efficiency complement to solar power. A new, motionless rooftop wind energy ...

A compact, "motionless" wind turbine with a magnetic generator designed for large commercial rooftops provides 5 kW of capacity per unit.

About a year ago, I first talked about the Aeromine rooftop wind turbine and its unique "motionless" design. Now, a new rooftop turbine is hitting the scene.

We proudly introduce the new and improved version of the Ventum wind turbine, designed to harness the power of the wind for on-site energy production, storage, and consumption. The VX175 is our first ...

Reimagined, it has been purpose-built for commercial and industrial rooftops, offering an energy solution for manufacturing facilities, warehouses and multistory buildings, complementing ...

Using aerodynamic first principles, a new type of rooftop wind energy generator matches solar power for industrial buildings.

Aeromine combines local GIS data, expert knowledge on building performances, and proprietary tools to analyze regional wind resources. With this expertise, we can support your decarbonization journey ...
