Modular, solar-powered shipping-container systems for remote living and businesses. Complete off-grid power solutions built by licensed electricians at Danger Electric.

Beyond mounting the solar panels on the roof of the container on delivery, NO wiring or assembly is required to have your own storage, living space or workspace ready in just a few hours.

Each 20 foot or 40 foot container comes with a custom fitter solar panel array, see spec pages for different solar panel array and battery bank sizing options. 375W panel setup only takes a couple hours!

The container was in stock, but it took over two weeks to get it scheduled for delivery. Once scheduled, it was fine.

The entire container and floor are closed-cell spray foamed. It's insulated very well: it's framed and has cedar planks for interior walls. The wind turbine will not be included unless customer is interested for ...

Deployable from a standard 20-foot shipping container, each unit can be unpacked and made operational in a day with little to no heavy equipment.

If you have some DIY skills you can certainly build out off-grid options for yourself, but we wanted to offer two options as part of an off-grid package you can choose to have implemented on your build.

The LunaVault was conceived as a solution to the growing demand for portable and adaptable off-grid energy systems. From powering remote homes and industrial sites to providing ...

For instance, specialized units like the LZY-MS1 Sliding Mobile Solar Container pack fold-out solar panels, inverters and batteries into a 20-foot steel box. Deployed in under an hour, ...

Delivery time for 20-foot off-grid solar container

Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean ...
