Egypt is positioning itself as a major player in the global solar panel manufacturing industry, with ambitious plans to produce 20 GW of solar panels annually.

Egypt's renewable energy sector is poised for major expansion, with large-scale solar panel factories expected to begin production in early 2026 using up to 90 per cent locally made ...

In 2023, Egypt commissioned the Ain Sokhna quartz production complex--Africa's first integrated facility of its kind--and launched the New Alamein silicon production complex, which will ...

He announced that a number of solar panel manufacturing plants will begin actual production in the first quarter of 2026, with a local content ratio ranging between 80 and 90 percent, ...

In this edition of the Weekend Read, we turn to Egypt. The gigawatt-scale Benban project showcases the North African country's solar potential, and premium prices for gas exports make the ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis. Obelisk, located in Nagaa ...

Egypt will begin solar panel production in early 2026 with a local component rate of up to 90%, according to Hossam Heiba, CEO of the General Authority for Investment and Free Zones (GAFI).

Egypt has revised its targets upward, now aiming to generate 42 percent of electricity from renewable sources by 2030 and over 60 percent by 2040, leveraging wind, hydropower, ...

Egypt gets its first large integrated solar PV and battery storage plant -- a 1.1 GW solar PV plant with integrated 200 MWh battery will deliver dispatchable clean energy, enhance grid...

Does Egypt have photovoltaic panels now

But the potential is vast. In mid-December, Egypt just inaugurated another big solar facility, with a nameplate capacity of 500 megawatts (0.5 gigawatts). The new installation was built in ...
