Will the future homes standard increase solar energy use?

The changes outlined today will maximise the use of solar energy through the Future Homes Standard. In 2023, the previous government proposed that new build homes would either need solar panel coverage equivalent to 40% of the building's floor area or none at all.

Will solar panels be included in the future homes standard?

Ministers are publishing the Future Homes Standard this autumn and have confirmed today (Friday 6 June) that solar panels will be included, leading to installation on the vast majority of new build homes.

Should new homes have solar panels?

Energy Secretary Ed Miliband said: Solar panels can save people hundreds of pounds off their energy bills, so it is just common sense for new homes to have them fitted as standard. So many people just don't understand why this doesn't already happen. With our plans, it will.

Is 2025 a good time for a solar powered home?

Whether motivated by environmental concerns, energy independence, or long-term financial savings, 2025 is an excellent time to begin your journey toward a fully solar powered home.
