This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

With contributions from TSOs, banks, developers and optimisers, the Summit explores regulation, merchant strategies, financing, grid tariffs and project delivery in a market forecast to ...

With economies of scale and improvements in the supply chain, the UK government has removed the cap on Nationally Significant Infrastructure Projects (NSIP), contributing to the growing ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

With over &#163;20 billion of battery energy storage projects in planning, and Clean Power 2030 calling for 23-27 GW by decade's end, the pressure to deliver is rising -- not just for developers, but also for ...

Ofgem has confirmed that 77 LDES projects, totalling 28.7 GW, have passed the first eligibility stage under its new cap and floor scheme. Of these, 71 projects (24.5 GW) are expected to ...

Britain will only make effective use of its energy potential if grid-scale energy storage keeps pace with the expansion of new windfarms and other forms of intermittent renewable energy, ...

Data published by RenewableUK just over two weeks ago showed that the amount of energy storage projects in the UK that are operational, under construction, consented or being ...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.

# Energy storage ratio of UK new energy projects

Over 43GWh was approved in 2024, an increase of 35% from 2023 and this year has already seen over 8.9GWh of approvals, including one of the largest consented projects in the UK so ...
