-----

A successful example of V2.0 smart wind farm Envision. The power generation increases by 14%, and the project construction cost can be reduced by about 350 RMB /kW with the optimization of the ...

Laser measurement systems to align gearbox and generator, measure flatness of tower flanges, and more.

Envision" s world first smart wind turbine for low wind speed sites has accelerated the strategic realignment of China"s wind power industry by effectively tapping low wind speed areas, which ...

Single blade assembly work on Envision Wind Turbine Generator (WTG). Blade positioning, alignment & safety checks performed by site engineers during installation....more

Through artistic tower painting designs, we imbue wind turbines with an aesthetic dimension. This transforms clean energy infrastructure beyond pure functionality, making each turbine a contributor to ...

Envision is the first in the industry to develop smart turbines that combine advanced control systems, data analysis, active performance control, and reliability prediction capabilities.

Envision Energy has entered into a wind turbine supply agreement with REE Group for nearshore wind projects with a combined capacity of 128 MW in Vietnam"s Vinh Long province. The ...

Envision Energy will supply turbines for several wind power projects of REE Group, which are set to become Southeast Asia"s largest single-turbine nearshore wind power projects.

This breakthrough reaffirms Envision"s leadership in global wind innovation and its commitment to accelerating the transition to net zero through next-generation clean energy ...

Envision Energy has announced the signing of a turbine supply contract with Vietnam"s REE Group for 128 MW nearshore wind projects, including V1-3 Phase II 48 MW and V1-5& 6 Phase ...
