The removal of a tax rebate for Chinese PV exports is set to drive up module prices as overseas buyers rush to secure lower-priced products.

China will cancel value-added tax export rebates for photovoltaic products from April 1, the finance ministry said in a joint statement with the State Taxation Administration on Friday.

The export tax rebate system has been in place since 1985. It was introduced to refund the indirect taxes paid on the production and distribution of export goods, enabling them to enter ...

China eliminates solar export tax rebates effective April 1, 2026. Module prices forecast to rise 10-15%. Get the complete analysis and pricing outlook.

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of respondents now must ...

The tariff pause allowed panels to continue to be imported between April 1, 2022, and June 6, 2024, without threat of extra taxes. When the CIT ordered that tariffs should have been ...

In a joint statement issued by the Ministry of Finance and the State Taxation Administration, it was revealed that the export tax rebate rate for photovoltaic products, along with ...

The US Court of International Trade decision represents a hard blow to developers and importers who brought in huge amounts of low-priced, largely Chinese-made solar imports from ...

The announcement, jointly issued by the Ministry of Finance and the State Taxation Administration, said that export tax rebates for the value added tax of photovoltaic products will be ...

# Exported photovoltaic panels were returned

Current Tax Refund Rate for Photovoltaic Exports As of December 1, 2024, China's export tax refund rate for photovoltaic panels stands at 9%, marking a significant reduction from the previous 13% rate.
