-----

South China's Guangxi Zhuang Autonomous Region welcomed its first offshore wind farm on Sunday, which, when fully built, will supply electricity to five million local families. Engineers ...

The world's first offshore wind farm using 16 MW turbines was put into operation and started power generation on Wednesday, operator China Three Gorges Corporation said.

Find company research, competitor information, contact details & financial data for Ningxia Fengqing Wind Power Equipment Co., Ltd of Wuzhong, Ningxia. Get the latest business insights from Dun & ...

China has successfully completed the first flight of its home-designed floating wind turbine, the S1500, in Hami, Xinjiang. The system passed strict tests, including full desert assembly ...

At an average annual wind speed of 10 m/s, a single 26 MW turbine can generate 100 million kWh of clean electricity per year, saving more than 30000 t of standard coal and reducing more than 80000 t ...

Wind power could soon come from the sky as China has successfully tested a megawatt-class airborne turbine that generates electricity while hovering 2000 metres up.

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity ...

In one of his more sane moments he spent his time analyzing high altitude wind power. This time around the materials science and electric generators and high power systems have evolved.

An aerial drone photo taken on May 21, 2024 shows the wind turbine units of a wind farm off the coast of Fangchenggang, south China's Guangxi Zhuang Autonomous Region.
