-----

The utility model discloses a mounting bracket for a photovoltaic power station complementary to fishing and light, which comprises a load-bearing rod, a triangular bracket, a...

In view of the uniqueness of its structure, the flexible bracket has a wide range of application scenarios, similar to sewage treatment plants, agricultural light complementarity, fishing light complementarity, ...

The main function of the fishing light complementary photovoltaic bracket is to erect the supporting structure of photovoltaic panels above the water surface of the fish pond.

In the fishery-photovoltaic complementary project, the flexible solar mounting system can meet the sunlight demand for power generation and fishery by controlling the row spacing flexibly.

Enter the fishing light flexible bracket photovoltaic module - the unsung hero modern anglers didn't know they needed. These bendable solar panels are turning night fishing operations into daylight robbery ...

The fish-light complementary model not only helps achieve the cross-border integration of clean energy and aquaculture, but also promotes the transformation and upgrading of aquaculture, accelerates the ...

This project is currently the largest photovoltaic power generation project with flexible brackets in China, which was completed on May 28th, 2020 and officially put into operation.

As coastal cities face increasing energy demands, a surprising solution has emerged from combining photovoltaic (PV) bracket technology with marine lighting systems.

Project Content: The fishing and light complementary photovoltaic power station uses the vast area of the fish pond to install solar panels on it to generate electricity.
