---

In this eye-opening episode of The Clean Power Hour, host Tim Montague sits down with Adam Saghei, CEO and founder of We Recycle Solar, to tackle one of the clean energy industry's most pressing...

This chapter examines the challenges associated with the widespread use of photovoltaic technologies, their consequences as end-of-life solar panel, and the need for ...

An equipment reseller and recycler shares about how they reuse secondhand solar panels and practice responsible recycling to add to the circular economy.

This EBOT explores the global state of solar panel recycling and end-of-life opportunities for these products, with a focus on U.S. capabilities and policies that incentivize recycling.

The 3 Rs of Waste Management PV R& D has set priority topics for material use reduction or substitution for different components commonly used in today's PV panels

The rapid proliferation of photovoltaic (PV) solar cells as a clean energy source has raised significant concerns regarding their end-of-life (EoL) management, particularly in terms of ...

Companies and researchers are now racing to prepare for the looming tsunami of PV waste. They are developing technologies that promise to recover far more of the useful materials from cells while ...

The global shift to clean energy has resulted in a significant increase in photovoltaic (PV) panel installations. However, with their limited lifespan of 25-30 years, end-of-life (EoL) management ...

As we outline here, scientists, companies, and policymakers must set out mechanisms, regulations, and technical pathways to encourage more solar PV panel recycling and avoid this ...

# Focus Interview on Waste Photovoltaic Panels

Together, they discuss the origins of Green Clean Solar, their mission to address waste in the solar industry, and the importance of finding sustainable solutions for waste management in ...
