Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication modules, ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Often described as the "brain" of solar systems, these devices manage power output and grid communication. U.S. officials found communication modules in some Chinese-made inverters ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

Over the past nine months, U.S. experts have identified these undocumented devices in solar power inverters and batteries from multiple Chinese suppliers during detailed security ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators have ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...
