What is a solar hand crank camping lantern?

My early experience with this solar hand crank camping lantern has shown it to be just such an addition. It is a lantern, a flashlight and has the capacity to charge your phone which could be critical in an emergency. The lantern can be charged with a USB, solar power or by using the attached hand crank. The unit is lightweight yet very sturdy.

What is a rechargeable LED camping lantern?

Long Work Time & Super Bright Lights & Type-C Charger: With a built-in rechargeable battery and 12 individual low-consumption LED bulbs, this rechargeable LED camping lantern can provide 360-degree ultra-bright light (200LM) and work at least for 30H if fully charged. The flashlight is also much brighter than regular lights (350LM).

How to charge a camping lantern?

3 Charging Ways - Type-C Cable & Solar & Hand Crank: This camping lantern is mainly charged by a regular 5V Type-C cable, only 2 hours to be fully charged. The solar panel will absorb energy under sunlight to charge the battery. Rotate the crank handle anytime and anywhere for 3-5 minutes to activate the battery once it goes dead.

How to charge mesqool led camping lantern?

Mesqool LED camping lanterns have built in 3000 large capacity rechargeable batteries and solar panel. It can be charged not only via regular 5V USB charging cable (included), but also by reliable solar and hand cranking when you are out of power supply.
