Are hotels investing in solar power plants?

More and more modern hotels are investing in the construction of their own solar power plants. Avenston designs and builds solar energy solutions for hospitality companies. Our solar power plants are installed on the roofs and facades of hotels and provide clean and cheap electricity.

Why should you install solar panels in hotels?

Installation of the solar panels in the hotels will help you save a huge amount of money. The solar panels installation cost and PV system turnkey price is quite affordable so anyone can easily use them on a regular basis. Solar panels also provide energy reliability and you can also save energy for the later use.

Are solar power plants a good investment?

On-grid, off-grid and backup solar power plants are used in the power supply systems of hotels, suburban recreation centers, boarding houses and sanatoriums. Investments in these systems significantly reduce the cost of electricity, which was previously purchased from other companies, and allow significant savings.

Why should you build your own solar power plant?

Own solar PV power plant can significantly reduce electricity bills by offsetting part of the consumption for lighting, air conditioning, etc. Building your own solar power plants allows you to get significant savings in electricity consumption and increase the competitiveness of your business.

As the hospitality industry continues to embrace sustainable practices, solar power systems for hotels is increasing to reduce their carbon footprint and save on energy costs. Solar ...
