Explore 23,000+ wind farms worldwide on an interactive map. Comprehensive database of wind energy projects with detailed information on capacity, turbines, and locations.

Every week on our website and in our email newsletter we want to show you that wind energy is more than just technology. We therefore invite you to send stunning pictures of wind turbines inspired by ...

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

Last year's growth - 109 GW of new onshore wind and 8 GW of offshore wind - brings global cumulative capacity of wind energy to 1,136GW, spread across all continents, with 55 countries installing wind ...

For the first time in history, the world's top four wind turbine manufacturers are Chinese: Goldwind, Envision, Mingyang, and Windey. Meanwhile, in 2024, Europe reached a 92% share of its ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

Wind power has grown rapidly since 2000, driven by R& D, supportive policies and falling costs. Global installed wind generation capacity - both onshore and offshore - has increased by a factor of 98 in ...

The IEA Wind TCP is an international co-operation of 22 countries and 2 sponsor members that share information and research activities to advance wind energy deployment.
