Does Rosemary need full sun or shade?

If you've ever wondered whether rosemary needs full sun or shade, the answer is clear: rosemary loves plenty of bright light. This fragrant Mediterranean herb grows best when it receives at least six to eight hours of direct sunlight each day, making full sun a key factor in its success.

Do you need a light for a Rosemary plant?

During darker months, or if sunlight is limited, supplemental lighting becomes critical. LED grow lights placed just a few inches above the plant will fill the gap and keep rosemary dense and healthy. Remember, even the sunniest window usually provides only half the light rosemary would get outside.

Why does Rosemary need so much sun?

Let's dig into why rosemary needs so much sun and how to ensure it gets enough of the light it craves. More exposure to sunlight results in a stronger flavor. The earthy, sage-like aroma of rosemary comes from the plant's volatile essential oils (terpenes). These oils form in leaf structures called trichomes.

How do you grow a Rosemary plant?

When you give rosemary the right growing conditions when it comes to sunlight, temperature, watering, fertilizing, and soil, it will reward you by growing and producing fast and efficiently, eventually allowing you to harvest almost endless amounts of rosemary while the plant continues to grow better and better.
