Are there private solar companies in Costa Rica?

There are many private companies, most of them members of ACESOLAR (Costa Rican Solar Energy Association), and the CDG (Chamber of Distributed Energy Generation of Costa Rica). They have changed the current legislation opening the market and allowing more solar panels and batteries to be installed.

Can solar power improve Costa Rica's energy security?

Solar energy, though currently a minor player, offers untapped potential to enhance Costa Rica's energy security. The country's tropical climate ensures consistent sunlight, making solar PV systems ideal for both utility-scale and distributed generation.

Who is the target market for solar energy in Costa Rica?

According to the Costa Rican Institute of Electricity (ICE) and the Costa Rican National Power and Light Company (CNFL), both government entities, the target market for solar energy in Costa Rica, remains to be households or companies that consume between 200kw/h and 3,000kw/h. ICE and CNFL have been installing photovoltaic systems.

Is solar a viable energy source in Costa Rica?

Critically, the literature reveals gaps in solar-specific research for Costa Rica. While hydroelectric and geothermal energy dominate academic focus, solar remains underrepresented, despite its potential to address energy security and grid stability.
