At Marie Selby Botanical Gardens, sustainability blooms with rooftop gardens, solar power, and the world's first energy net-positive restaurant.

With over 2,000 new solar panel arrays, the downtown Sarasota campus of Marie Selby Botanical Gardens plans to produce more power than it consumes.

Image courtesy of Marie Selby Botanical Gardens Phase One will produce an astonishing 1.27 million kilowatt-hours of power per year, enough to power 175 average American homes. That ...

Selby Gardens Redesigned as International Model for Sustainability A history-making "Power On" moment has arrived at the 15-acre bayfront sanctuary, Marie Selby Botanical Gardens. A ...

US architecture studios Olin and Overland have completed the "world's first net-positive energy" botanical garden in Florida, which is powered by a rooftop array of 2,158 solar panels.

The solar array was activated in late June, marking the beginning of a year-long monitoring period to ensure the project generates more energy than it consumes. The project aims to ...

Stretching up to 16 stories high, Gardens by the Bay's iconic Supertrees aren't just Instagram bait--they're vertical gardens housing over 162,900 plants from 200 species. These ...

The solar array is part of a larger initiative to transform the Gardens into a leader in green energy and sustainable practices. This initiative aligns with the project mission to inspire and ...
