Ireland Targets 8GW Solar by 2030: Achieving the Ireland solar energy target Ireland is on a determined path to reshape its energy landscape, with solar power playing a pivotal role. The nation is driving ...

While there may be an assumption that Ireland's generally grey skies are not conducive to solar energy, technological advances mean it is now possible to source PV panels designed specifically for the ...

As of 2024, Ireland's installed solar capacity has reached new milestones, contributing to the nation's ambitious target of generating 80% of its electricity from renewable sources by 2030.

Ireland has reached 2GW of solar power. Encom explains what this milestone means for homes and businesses in 2026 and how the EUR1,800 SEAI grant supports new installs.

Ireland's current installed solar capacity is just under 2 GW, but this could be increased thanks to favorable policy, grid investments, and energy storage.

"Ireland has made huge progress in our journey to renewable energy. Wind power supplied approximately one third of national electricity demand in 2024, with renewables accounting for around 40 ...

Ireland saw new records set for solar power on the national electricity grid in March, with 39% of electricity coming from renewable sources 1 last month according to provisional figures from EirGrid.

Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2GW for the first time, it has been revealed. This milestone reflects the remarkable pace of ...

The Irish solar industry is experiencing a remarkable growth spurt, with solar photovoltaic capacity soaring by 80% in 2024, highlighting the country's commitment to sustainable energy.

Dublin, 13 November 2025 - Ireland celebrated a landmark moment in its clean energy transition, with
