---

Complete power protection and battery backup for business network equipment, servers, storage, and other critical equipment. High performance 3-Phase power protection for any size data center and ...

Housed in a tough enclosure, our solution provides reliable, lightweight, and compact energy storage for uninterruptible power supply (UPS) systems. Battery cabinets are designed to hold batteries used to ...

High-performance surge protection device that protect electronic devices by suppressing surge voltage induced by lightning. This model is intended for AC/DC contact signal or synchro signal lines.

Installing CMCE devices in data centers provides a cost-effective solution to minimize the risk of lightning-induced downtime, protecting both equipment and revenue streams. At EMP ...

Read our blog to discover the common challenges and solutions regarding data center protection against lightning strikes.

Our advanced lightning protection for data centers are engineered specifically for the unique challenges of complex power infrastructure.

Nothing can stop lightning strikes during a thunderstorm, but installing an ADVANCE+ lightning arrester with a PDC arrester ensures an optimal level of protection, offering maximum safety to people and ...

Integrate coordinated measures for lightning protection, surge protection, shielding and earthing into the safety concept of your computer infrastructure. As a full-service provider, we can supply you with ...

Well, actually, our field studies show 43% of premature battery cabinet failures stem from improper lightning arrester coordination - not direct lightning strikes.

# Japan Data Center Battery Cabinet Lightning Protector

An all-round solution for insulated lightning protection, this down conductor provides integrated protection against electric shock, making it especially suitable for use in hazardous areas.
