Central to the functionality of the fully automated photovoltaic bracket production line are our powerful three-in-one decoiler straightener feeder machines, seamlessly integrated with a punching press and ...

All our machines have one-year warranty. If there is any problems of machine parts under " normal use", new machine parts will be sent to you but your side should pay the shipping cost.

JGX1412 is an Angle Punching, Marking and Cutting machine for Angles up to 140*140*12mm. This machine is mainly used for processing holes on angles. The positioning, feeding of the machine are ...

The invention relates to the technical field of press working, in particular to automatic punching equipment for a photovoltaic bracket.

Scope of application: It is used for the operation of sawing and punching all-in-one machine for solar photovoltaic edge pressing block, photovoltaic intermediate pressing block, photovoltaic clamp and ...

Introduction The metal bracket production line is our newly launched production line, with fast stamping speed and high production capacity. The technology is quite mature, and the bracket is widely used ...

JGX1412 is an Angle Punching, Marking and Cutting machine for Angles up to 140*140*12mm. This machine is mainly used for processing holes on angles. The positioning, feeding of the machine are ...

It combines two core processes of punching (for mounting holes, positioning holes) and cutting (for length fixed-length cutting) in one machine, eliminating the need for multiple equipment transfers and ...

It is designed for materials like aluminum and steel, with a material thickness capacity of up to 2.5mm. The machine features a portable design at 3.5KG and is suitable for applications such as ...
