-----

In 2021, Juwan Technology Research has taken the lead in achieving global mass production of XFC ultra-fast batteries and set the WRCA world record for "fastest electric vehicle charging technology";

The "world's first professional factory for ultra-fast charging power batteries" put into production this time is located at the Nansha headquarters base in Juwan, east of the Dongyong section of Nansha Avenue, ...

As the world's first professional factory for ultra-fast charging power batteries, the base will have a total production capacity of 8GWh/year after full completion, and 4Gwh has been put into use.

Juwan Technology said that the Juwan Phoenix battery will be mass-produced next year at the Juwan Technology (Nansha) energy storage device and system production base, and it is expected to be ...

To address this, Juwan Technologies has introduced the "Phoenix Battery," which can charge from 0% to 80% in just 6 minutes, while also improving safety. So, what are the new technologies behind it?

The company focuses on the research and development, manufacturing, sales, and service of super fast charging power batteries, as well as a new generation of breakthrough energy storage devices and systems.

On June 6, Juwan Technology held the "2023 Juwan Phoenix Battery Technology Conference" and officially released the Juwan Phoenix battery with XFC ultra-fast battery technology.

This heavy-duty truck will be equipped with the first-generation 3C rate XFC battery of Juwan Technology, which can achieve a charging time from 0 to 80% SOC in only 15 minutes.
