Kampala, January 12, 2020 - The long-awaited project for the development of vital infrastructure network in Kampala Industrial and Business Park (KIBP) in Namanve has taken off.

As Uganda accelerates its renewable energy transition, the Kampala Energy Storage Project subsidy has become a focal point for businesses and investors. This article breaks down the ...

Mini grids are made up of generators and energy storage systems and can be powered by a variety of sources, including solar, wind, hydro, or biomass. As of 2020, Uganda has 34 known ...

Now, the convergence of modular battery technology, AI-driven management systems, and innovative financing is giving rise to a new model--villages can operate resilient microgrids ...

Uganda's renewable-hybrid mini-grid market is less mature than those in neighboring Kenya and Tanzania both in terms of the number of projects completed and the number of players operating.

This article explores how modern energy storage technology addresses power instability, supports renewable integration, and drives industrial growth across East Africa.

Access to electricity and off-grid refrigeration will allow small and medium-sized businesses in rural communities to establish new ventures to support economic development in ...

In its National Electrification Strategy, the Ministry of Energy and Mineral Development (MEMD) foresees the development of over 2,000 mini grids to connect more than 230,000 households by 2030. ...

This gap is especially pronounced in rapidly developing industrial parks such as the Kampala Industrial and Business Park (KIBP) in Uganda. Therefore, this study examines the potential and challenges of ...

In September 2025, we deployed our first microgrid to a small community of 10 customers in a small densely

Kampala industrial microgrids

populated town called Nansana, right outside the Ugandan capital of Kampala.
