Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

How will China-Laos energy transition work?

The clean energy produced will be transmitted to Yunnan province in China via the China-Laos 500kV grid, supporting Yunnan's energy transition and power supply security. Laos is currently at a critical stage of its energy transition.

How does CGN contribute to Laos' economic development?

In addition to contributing to Laos' economic development, CGN is committed to sharing the benefits with local communities. CGN has implemented initiatives such as vocational training, educational support, community building, medical assistance, and agricultural aid to address urgent local needs and improve living standards.

The first phase of the 1-million kilowatt photovoltaic project at China General Nuclear Power Group (CGN) clean energy base in northern Laos officially commenced on Wednesday, local ...

Laos has approved a 5MW solar project in Sanamxay district, Attapeu province, according to a Memorandum of Understanding (MOU) signed between the government and the developer, Lao ...

A 1,000-megawatt solar power project in northern Laos" Oudomxay Province has reached 60 percent completion and is scheduled to begin operations by the end of 2025, according to ...

The interconnection base, located across Oudomxay, Luang Namtha, and Phongsaly provinces in northern Laos, is a cornerstone of the China-Laos Power Interconnection Project. It is ...

The successful launch of this project in Laos is a testament to the maturity of the solar industry and its ability to deliver clean, reliable power on a massive scale. As this facility begins ...

Laos installs solar power

Construction has commenced on the first phase of the one-million-kilowatt photovoltaic project at China General Nuclear Power Corporation (CGN)'s clean energy base in northern Laos. In ...

Oudomxay Province has inaugurated a 1,000-MW solar power project, marking one of Laos' largest renewable energy developments. The project was developed by CGN Energy Technology (Laos) ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects. Electricite du Laos (EDL), ...

Laos launches 1,000 MW solar power project in Oudomxay, generating clean energy, creating jobs, and strengthening regional electricity cooperation with China.

The PV power generation project that began construction yesterday was the first phase of the clean energy complex. CGN and the Lao government signed another deal in August for the ...
