Why Energy Storage Cabinets Are Making Headlines (And Not in a Good Way) A sleek energy storage cabinet humming quietly in a German suburb suddenly erupts into flames, sending shockwaves ...

U.S. Environmental Protection Agency (EPA) has entered into a settlement agreement with Gateway Energy Storage, LLC to direct cleanup in the wake of a lithium-ion battery fire that ...

Watch the energy storage systems webinar now to learn more about 2022 intervening code changes to Ch 12 in the Fire Code, residential energy storage, commercial energy storage, and micro mobility ...

When an energy storage cabinet battery fire incident made headlines in Arizona last summer, it sparked more than just lithium-ion flames - it ignited a crucial conversation about grid-scale battery safety.

The US Environmental Protection Agency (EPA) has entered into a settlement agreement with IPP LS Power to direct cleanup after a lithium-ion battery fire at the company's ...

Hundreds of people were ordered to evacuate and part of Highway 1 in Northern California was closed after a major fire erupted at one of the world's largest battery storage plants.

But as more energy storage is added, residents in some places are pushing back due to fears that the systems will go up in flames, as a massive facility in California did earlier this year.

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

People living near a power plant in Central California were ordered to evacuate their homes Thursday night after a fire broke out at the facility, officials said.

Latest news on energy storage cabinet fire

A report released Friday by a clean-energy trade group spells out best practices for safe use of large-scale battery energy storage systems following a major fire at a battery facility early...
