For the better part of a decade, the battery industry has taken for granted that when the prices of lithium and cobalt spike, pack prices inevitably follow. But 2025 has seemingly broken that ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have fallen...

The volume-weighted average price for lithium-ion battery packs dropped 8% YoY to \$108 per kilowatt-hour, according to BloombergNEF's annual battery price survey, which tracks pack and cell price ...

The steady downward march of lithium-ion battery prices is one of the key stories of the energy transition. The trend continued last year.

BNEF expects pack prices to decrease again in 2026, based on its near-term outlook, as raw material prices face upward pressure but adoption of low-cost LFP continues to spread.

Recent estimates show that the average global price of lithium-ion batteries will reach 112 U.S. dollars per kilowatt-hour in 2025. Battery pack prices are projected to drop below the 100...

In 2025, global lithium-ion battery pack prices fell to a record \$108/kWh, defying the rise in lithium and cobalt costs. This trend reflects a maturing supply chain, increased adoption of LFP chemistries, and ...

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged 45%, EV packs ...

BNEF: Li-ion battery prices fall despite rising metal prices 11 December 2025 Lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kWh, according to the latest battery ...

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from

Lithium battery pack price trend

2024. This represents the steepest decline among all lithium-ion battery use ...
