A high-capacity, 2 megawatt-hour battery energy storage system integrated into a standard 40ft container. Designed for large-scale renewable integration, peak shaving, and grid stabilization, it ...

The modular design makes the parallel solution more flexible and has higher energy density, which significantly improves the economy, safety and construction convenience of ESS projects.

Intelligent constant temperature control of the battery, high protection structure design, support outdoor use; The battery is deeply discharged with 100% DOD, and the cycle life exceeds 6000 times under ...

Our battery storage system provides seamless integration with BMS and EMS, which offers comprehensive control, monitoring, and efficient operation of the entire energy storage configuration, ...

With 95% efficiency, modular design, and seamless integration with renewable energy sources, this system enhances grid stability and reduces energy costs. Ideal for large-scale energy storage needs.

For more information about our container battery energy storage system solutions, including OEM partnership opportunities and customized configurations, please contact our technical sales team.

The 215kWh-2MWh Container Energy Storage System and industrial and commercial energy storage battery cabinets are high-capacity, scalable Battery Energy Storage Systems (BESS) designed to ...

Polinovel 2MWH commercial energy storage system (ESS) is tailored for high-capacity power storage, ideal for large-scale renewable energy generation, PV self-consumption, off-grid applications, peak ...

Our after-sales survey service ensures continuous performance monitoring, proactive maintenance, and troubleshooting, ensuring that your system always operates at peak efficiency.

Modular Battery Cabinet 2MWh After-Sales Service

Adopting 40-foot non-walk-in container design, the highly integrated and modular energy storage unit inside the container is convenient for transportation, installation and maintenance.
