Our company owns and operates fleet of Mobile Offshore Production Unit (MOPU) & Floating Storage Offloading (FSO) vessels in Southeast Asia and Middle East.

The practice of converting jackup drilling rigs to mobile offshore production units (MOPUs) is becoming more common in the oil and gas industry. This option is an economical choice for early production or ...

ABS can provide the following services to assist with the conversion of self-elevating units into mobile offshore production units: Design Review - These requirements cover design considerations, ...

Many innovative procedures are pioneered by Noble Offshore engineers, including novel anchor-tensioning systems, unique TLP connection processes, and the use of marine simulators to identify ...

For more and more applications, oil companies are considering the use of mobile offshore production units (MOPUs), especially jackups, instead of conventional platforms. A variety of economic ...

Following the early concept and Pre-FEED stages, should a MOPU be deemed the most efficient option, our expert teams can support in engineering the conversion and delivery of MOPU ...

Following the early concept and Pre-FEED stages, should a ...

Designed as an on-site generating system where low emissions, fast setup and reliable operation are critical, the T60 MPU is based on the proven Solar® 5.7 MW Taurus(TM) 60 gas turbine generator set ...

For more and more applications, oil companies are considering the use of mobile offshore production units (MOPUs), especially jack-ups, instead of conventional platforms. A variety of economic ...

Each MOPU is delivered as a complete production solution, including separation systems, flare stacks, utility modules, chemical injection, metering, power generation, and safety systems. Units can be ...
