---

JA solar JAM54D40 series is an n-type bifacial double glass high-efficiency mono module, with higher power generation better LCOE, n-type with very lower LID, better temperature coefficient, and better ...

single glass modules with fully-tempered front glass have higher impact resistance and mechanical strength, and are less possibility to burst when used outdoors;

Designed to deliver high efficiency through N-type TOPCon cell technology, this module captures sunlight on both sides, optimizing energy production even in reflective and low-light environments.

Trina Solar, the world leading global PV and smart energy total solution provider, recently announced that it has begun mass production of N-type i-TOPCon...

Excellent Low Light Performance Our modules can also provide higher power output under low light conditions, such as sunset, cloudy, or dawn.

The products support customised designs such as single-sided, double-sided and double-glazed, with an output power of 560-605w. The non-destructive scribing technology is used to significantly ...

By using multiple main grid high-efficiency N-type batteries combined with battery half cutting technology, the product has higher output power, and the power generation gain significantly ...

ZERO LID (Light Induced Degradation) N-type solar cell has no LID naturally which can increase power generation.

Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Module power increases 5-25% generally, bringing significantly lower LCOE and higher IRR. The N ...

Dual glass is the preferred structure for the rear side cover of the N-type modules because the glass-glass version can maximize the advantages of the N-type.
