The 200 MW solar plant will span 314 hectares in Sanankoroba, near Bamako. Upon completion, it is projected to increase the West African nation's electricity production by 10%.

Mali and Russia have officially launched construction on West Africa's largest solar power plant, a landmark project designed to address the nation's severe electricity shortages.

Across southwest Mali, near the Senegalese border and 500km from Bamako, thousands of new photovoltaic modules now track the sun above B2Gold's Fekola gold operation, marking the completion of ...

The Sanankoroba Solar Power Station, a 200 MW facility near Bamako is the largest solar installation in West Africa, setting a precedent for the region.

Mali has opened its first solar panel manufacturing plant, a facility fully owned by Malians. The new solar panel manufacturing plant will reduce solar panel imports and help boost Mali's progress in clean ...

Crucially, this tripartite project is the strategic enabler for Mali's solar transition: the 225 kV loop is specifically designed to evacuate power from the upcoming Kambila (40 MW) and Safo (50 MW) solar ...

With power outages lasting up to 18 hours a day in recent times, the 200 MW solar plant in Sanankoroba near Bamako is expected to make a substantial impact. This project, supported by Russia, ...

Mali has begun construction on a major 200 MW solar power plant in Sanankoroba, 38 km south of Bamako, in partnership with Russian firm NovaWind. Covering 314 hectares, the project is set to be completed within a ...

Construction of the second phase of the Fekola Solar Plant in Mali is officially complete and operational as announced by B2Gold. The new phase adds an additional 22 MW to the solar plant, making ...

## New solar module project in Bamako

The expansion of the Fekola Solar Plant was completed in the fourth quarter of 2024 and became operational in January 2025. The Phase 2 expansion included the construction of an additional 46,200 solar ...
