RODUCT. 2. PRIMARY DIMENSIONS ARE IN MILLIMETERS. 3. INDEPENDENT ADJUSTABLE REAR EQUIPMENT MOUNTING RAILS (EIA) ADJUST FROM 130mm [5.1in] TO 327mm. .87in] ...

At 46 inches (1168 millimeters) deep, this rack can accommodate large servers and other equipment of equivalent mass. The rack's 800-millimeter (31.5-inch) width provides side channels for mounting ...

Secure your offshore wind turbine operations with the JB29 equipment cabinet, designed for storing emergency survival and escape gear. Ideal for use in Europe and the US.

800mm X 42RU X 1200mm Deep Net-Access N-Type Cabinet With Dual Hinge Perforated Front Door, Solid Split Rear Doors, No Side Panels, Vertical Blanking Panels, Management Fingers, 12-24 ...

It provides local and remote human-machine interface, supports a variety of industrial communication protocols, monitors and records the grid, wind conditions and turbine operation in real time, and ...

The cabinet is made of high-strength, corrosion-resistant metal material. It integrates yaw, generator, and pitch control functions, allowing for precise adjustment of the wind turbine direction and blade ...

The machine-side converter rectifies the three-phase AC output from the fan-motor stator to DC to achieve stable DC voltage output under the conditions of different wind speeds and rotational speeds ...

Fibox is experienced in engineering, manufacturing and testing the required control units for wind turbines, and we can apply complete freedom in the design of enclosures specific to your application.
