-----  
Does Aboitiz Power have a hybrid energy storage system in Cebu?

Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure. The company is constructing a 30-megawatt hybrid Battery Energy Storage System (BESS) in Cebu, in collaboration with East Asia Utilities Corporation.

What is Nasipit hybrid energy storage?

The groundbreaking for Aboitiz Power's Nasipit Hybrid Energy Storage System marks a strategic step toward grid flexibility. The project combines thermal generation with battery storage- an emerging model for climate-resilient energy in Asia.

When will Therma marine & Aboitiz Power's Nasipit hybrid energy storage system be online?

Officials of Therma Marine, Inc. (TMI), a unit of Aboitiz Power Corp.'s unit, during the groundbreaking ceremony for its 48MW Nasipit Hybrid Energy Storage System in Nasipit, Agusan del Norte on Monday (April 21, 2025). The project is expected to be online by the second quarter of 2026. (Photo courtesy of AboitizPower)

Can battery energy storage be integrated into thermal generation assets?

As Asia's energy landscape undergoes rapid transformation, the integration of battery energy storage into thermal generation assets is gaining traction. Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure.

Briefing A new hybrid solar and battery storage project in Alaminos, Philippines, is significantly enhancing grid stability and increasing renewable energy reliability. This initiative ...

Aboitiz Power commits P1.2B to a pioneering hybrid BESS project in the Philippines. This model, integrating battery storage into thermal plants, is a blueprint for climate-resilient energy and ...

Aboitiz Power Corporation has announced plans to construct a 30-megawatt hybrid battery energy storage system (BESS) within the Mactan Economic Zone in Lapu-Lapu City, Cebu, ...

The initiative supports the Philippine Energy Plan 2023-2050, particularly its goal of expanding renewable energy in missionary and island areas. HANDPHIL Enertex said the project ...

# Philippines hybrid energy storage project

Vivant Solenergy Anilao Corp. (VSAC), a wholly owned subsidiary of Vivant Energy Corporation, is proposing a 173.1-megawatt peak (MWp) solar power project paired with a 99 ...

The Philippines has officially launched its first hybrid solar and Battery Energy Storage System (BESS) facility, marking a historic milestone in the country's renewable energy development. ...

The construction of a 48-megawatt (MW) hybrid battery energy storage system (BESS) in Nasipit has officially commenced, signaling another major step toward improving the stability and ...

MANILA, Philippines -- Vivant Energy Corp. (VEC) is moving forward with a P6.23-billion renewable energy project in Iloilo, aiming to bolster the stability of the Visayas grid through a hybrid ...

MANILA - Construction of the 48-megawatt Nasipit Hybrid Energy Storage System in Agusan del Norte has started, and is expected to boost grid stability by the second quarter of next ...

Alaminos Energy Storage aims to help enhancing the grid's stability and reliability by storing power when demand is low and feeding it back into the grid when the demand is high. ...
