With the rapid advancements in clean energy technologies and evolving market dynamics, embracing solar photovoltaic (PV) and energy storage solutions will be key to unlocking long-term value and ...

Building upon both strands of work, we propose to characterize business models of energy storage as the combination of an application of storage with the revenue stream earned from the operation and ...

Using the Web of Science (WoS) and Scopus databases, a scientometric analysis was carried out to understand the methods that have been used in the financial appraisal of photovoltaic ...

M& A transaction trends in energy storage continue to largely track broader renewable investment trends and are often not distinguishable from the acquisition of other renewable energy ...

Resources available through the U.S. Department of Energy (DOE), national laboratories, nonprofit organizations, and other government agencies can help small businesses and entrepreneurs work ...

Here we first present a conceptual framework to characterize business models of energy storage and systematically differentiate investment opportunities.

In this paper we investigate the investment decision in a photovoltaic (PV) power plant coupled with a Battery Energy Storage System (BESS), namely an Energy Storage System (ESS).

RE+ Northeast is the largest forum for professionals dedicated to the integration of solar, energy storage, and additional renewable energy assets like wind energy and electric vehicle infrastru...

Energy storage systems are making them possible - and creating unpreceden. Imagine this: A solar farm in Spain can now sell electricity at midnight. A factory in Germany slashes its energy bills by ...

Photovoltaic energy storage investment and entrepreneurship

The article carries out a bibliometric analysis of scientific publications related to the problem of investment and risks associated with the development of entrepreneurship and start-ups in the field ...
