-----

Insulation and protection for photovoltaic modules over several decades. We are a pioneer in the dynamic photovoltaic market and a leading manufacturer of backsheets laminates for solar modules.

EPE Insulation - The EPE insulation is a laminate similar to the PV back sheet. DUN-SOLAR(TM) EPE insulation has been developed to be used as an electrical insulator and physical spacer in critical ...

Backsheets safeguard the electrical components of a solar module by providing insulation and ensuring their longevity. Owing to their dielectric strength, they allow for the safe generation of electricity by ...

Our PV backsheet material for solar manufacturers is a cost-effective high performance PV backsheet that protects all components of the solar module.

In order to protect a panel for more than 25 years, a backsheet must have the optimal balance of three critical properties: weatherability, mechanical strength and adhesion.

Ever wonder what keeps your solar panels working for decades, even in harsh weather? It's not just the solar cells doing all the work. There's an unsung hero on the back of every solar ...

SOLAR-TDB(TM) is a single ply of SG7115/SG7135 melt-encapsulation sheet to provide good thermal dissipative capability and more than 1500V insulation. It replaces both T/P/T and EVA in traditional ...

These laminates, marketed under the company's dyMat® brand, provide electrical insulation and protect solar cells from humidity and other atmospheric agents. This guarantees the duration and correct ...

Good solar PV backsheets provide insulation and keep panels strong for years. Durable solar PV backsheets help panels work better and last longer. These solar PV backsheets improve ...

The backsheet is the rear protective layer of a solar panel, responsible for insulation, UV resistance, and

# Photovoltaic solar panel insulation sheet

environmental protection. Backsheet quality directly impacts long-term durability, module lifespan, ...
