What is a 19 inch server rack?

A 19 inch server rack is a piece of equipment designed to house and organize IT equipment, such as servers. The main benefit of this type of rack is that it helps keep the equipment cool. These racks generally have venting or openings in them to help with air circulation.

What is a 19 inch rack system?

Racking systems are most commonly found in computing with the main computer or server modules being mounted for ease of use and maintenance. 19 inch systems are also very common in music and audio environments as a range of preamps, interfaces, effects boards and mixers can be found in the universal 19-inch format.
