What is China's most powerful floating wind turbine?

In a bold leap forward for sustainable energy, China has unveiled the "Qihang," the world's most powerful floating wind turbine. Developed by the China Railway Construction Corporation (CRRC), this 20-megawatt giant is more than a technological marvel--it's a declaration of leadership in the global race toward clean energy.

What is a Qihang wind turbine?

Qihang stands as a monumental achievement in renewable energy technology. Developed by China Railway Construction Corporation (CRRC), this floating wind turbine boasts a rotor diameter of an impressive 853 feet, roughly the size of seven football fields.

When is China Wind power (cwp2025)?

04-02 China Wind Power (CWP2025) will be held from October 20-22, with leading companies joining the event! Riding the Wind for 18 Years, (CHINA WIND POWER) CWP has grown hand in hand with China's wind power industry, building strong partnerships with exhibitors who share the same vision.

What is China's S1500 wind turbine?

The S1500 is the latest in a series of wind turbine developments in China. (Photo courtesy of China Daily) Support CleanTechnica's work through a Substack subscription or on Stripe. China just answered that question with a massive flying machine that could change everything about how we think about electricity costs.

In a significant move towards a more sustainable future, China has unveiled its latest innovation in renewable energy--Qihang, the world's largest floating wind turbine. This 20 MW ...

This project is the first wind power project in southern Xinjiang. Once fully operational by the end of the year, the wind farm is expected to generate approximately 540 million kilowatt-hours ...

CHINA WIND POWER (CWP), the world's premier annual event for the wind power industry, celebrates its 19th edition in 2026. Over nearly two decades, CWP has not only witnessed China's wind sector ...

Data and information about Wind power plants and their location plotted on an interactive map of China.

# Qinwang Wind Power Station

China on Wednesday completed the installation of 20 units of five-megawatt wind turbines after a six-month endeavor. Situated in the Xizang Autonomous Region, with the highest unit ...

In a groundbreaking move towards sustainable energy, China has launched the world's largest floating wind turbine, the "Qihang," which promises to significantly reduce carbon emissions ...

The first-phase wind turbines of the 300-megawatt wind power project in northwest China's Xinjiang Uygur Autonomous Region have been connected to the grid, China Huaneng Group said on ...

With a total installed capacity of 500 MW, it operates 65 wind turbines each rated at 7.7 MW, making it China's largest single-unit-capacity wind power project in a high-altitude region. ...

In a bold leap forward for sustainable energy, China has unveiled the "Qihang," the world's most powerful floating wind turbine. Developed by the China Railway Construction Corporation ...

China isn't treating this as an experiment. This technology is a direct response to a government action plan running through 2030 that calls for large-scale high-altitude wind power ...
