-----

Community solar programs are spreading throughout the United States. Nineteen states and counting have passed legislation to encourage their development and to connect multiple residential, commercial or ...

Solar energy is a clean and renewable source of energy that can help communities achieve energy independence. By harnessing the power of the sun, communities can generate their own electricity ...

Residential Clean Energy Credit If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy ...

Learn how to generate solar energy at home and earn credits for the electricity you produce. Explore SCE's billing plans, rebates for battery storage, and ways to share solar benefits across accounts.

Individuals, small businesses, large companies, and municipalities can all choose to build and operate privately owned energy systems that connect to our Evergy grid. Examples include:

Solar projects are making it easier for Americans to choose solar energy to power their homes. Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans ...

As electricity prices soar and rooftop solar subsidies vanish, some U.S. renters and homeowners are surreptitiously installing solar panels on balconies and in backyards without their utility's ...

Even without the federal Residential Clean Energy Credit, many state and local incentives continue to make residential solar power a cost-effective investment. These include state and local tax credits, utility ...

It introduces community solar programs and their benefits, explains different ownership models, and ends with the best practices to keep in mind when starting a locally-owned community solar project.

Community solar projects represent a groundbreaking approach to shared renewable energy, allowing

# Residents own solar power generation

residents and businesses to benefit from solar power without installing panels on their own properties.
